I am pleased to recommend **Mr. Harsh Nagoriya** for an MS programme at your esteemed university. Harsh has been intern in my organization named "**ExpertsHub"** and He had worked on Machine Learning and Artificial Intelligence projects under my guidance and surveillance. He is a fine student, in terms of aptitude, hard work, and motivation.

An intelligent, sincere and conscientious student, Harsh Nagoriya has maintained a good performance record during Internship. His performance can be described through his clear concepts and strong fundamentals, which have always enabled him to grasp new ideas and topics with relative ease.

Deep learning and Convolution neural network are considered as the important topics in Data Science and he handled these concepts quite well. Harsh comes up with innovative ways of applying his concepts as he did while doing a project during internship. Harsh has also been an extremely active component of the technology scene. He was part of the team that created software for 'Recognition of handwritten digits' using Python. He has performed well as a solution specialist and application architect.

Always an independent thinker and is seeking to learn new ideas and concepts, he has shown great dedication by venturing beyond the scope of the subject ideas. He keeps himself updated of the latest developments and goes through various technical literatures which was evident from the technical discussions and interviews that I have had with him. A student who believes in performing to the best of his ability, Harsh will work very hard towards the fulfilment, of any responsibility that he undertakes. I strongly recommend him for admission to your college for graduate studies.

Yours sincerely,

Mr. Kirubakaran Reddy
